

TESMA[®]: OUR MODULES AT A GLANCE

TRANSPARENCY THROUGHOUT THE ENTIRE TECHNOLOGY LIFECYCLE

INVOICING

- Permanent electronic access to all invoices – including PDF format
- Detailed and individual assessment of invoice data down to the asset level

ASSET TRACKING

- Track and trace equipment movement with unique tracking process – from ordering to rollback
- Structured administration of technologies by means of definable device status and workflows throughout the customer process

OWN ASSET

- Records and manages all assets outside CHG-MERIDIAN's existing contracts
- Displays assets at a glance – regardless of supplier and financing options

E-PROCUREMENT

- Independent order platform with workflow-based ordering process with customized approval options
- Customizable International shopping cart

CONTRACT MANAGEMENT

- Quick access to all CHG-MERIDIAN contracts and technology portfolios
- Bi-directional maintenance of customer-specific data at the contract and unit levels, e.g. cost center, installation, and order data

REPORTING

- Dashboard allows quick access to reporting features of all modules
- Generates pre-defined, individual reports broken down all the way to individual cost centers

TESMA[®]: OUR INTERFACES AT A GLANCE

EASY CONNECTION TO THIRD-PARTY SYSTEMS

eINVOICING

- Electronically-exchanged invoice data for automated processing in your ERP system

OCI INTERFACES

- Interfaces for integrating existing eCommerce solutions from various suppliers into the TESMA[®] eProcurement module
- Solution for global electronic procurement

DATA BRIDGE

- Data between customer applications and TESMA[®]
- Import and export functions for interactive information exchange
- Define references and dependent reference values to assure data quality

TESMA[®] WEBSERVICE

- Automatically exchange data and integrate TESMA[®] into your existing process landscapes
- Standardized, low maintenance REST interface and secure HTTPS connection and authentication routines

TESMA[®] APP

- Cost-efficient capture and transmission of serial numbers, asset statuses, and other information
- Mobile-based process provides more reliable asset tracking
